Power Pipe Cutters

Power Pipe Cutter / Model 258

2½" (65 mm) to 8" (200 mm) Diameter Pipe

The RIDGID Model 258 Power Pipe Cutter cuts 2½" (65 mm) to 8" (200 mm) schedule 10*/40 steel pipe, galvanized pipe, rigid conduit, etc. at the job site or in the shop. Powered by the RIDGID No. 700 Power Drive, the 258 is a displacement cutter that provides square cuts. The operator controls the feeding rate by pumping the hydraulic foot pump throughout the operation. A square cut with minimal burr on either 6 m or nipple lengths of pipe is achieved quickly** without abrasive dust, sparks, or open flame. Also, the RIDGID Pipe Roller for beveling can be used to rotate the pipe while a second operator uses a grinder to bevel the pipe. Some of the 258 advantages are:

- Square cut 6 m or nipple lengths of pipe without effort.
- Easily cuts by displacing instead of removing pipe material.
- No abrasive dust, dangerous sparks, or open flame.
- Quickly cuts steel pipe with minimal burr.
- Ideal for cutting pipe for groove joining.
- Heavy-duty design is perfect for field or shop use.
- Adaptable for beveling.

Specifications

- Cutting Capacity: 2½" (65 mm) to 8" (200 mm) schedule 10*/40 steel pipe.
- Model 700 Power Drive (included with Cat No. 17871 and 17881).
- Power Drive RPM: 26-30 (no load).
- Weight: 105 lbs. (48 kg) (excludes No. 700 Power Drive, see page 4.15).

- One 8½" (215 mm) HD Cutter Wheel Assembly.
- One Hydraulic Ram and Foot Pump.
- Two 2½" (65 mm) to 12" (300 mm) Ball Transfer Pipe Supports.

**Use the thin wall cutter wheel for best results.*

***Cutting time varies with pipe schedule and diameter.*

Note: Model 258 is not recommended to cut cast iron pipe.

For optimum wheel life always properly support the work piece with ball transfer pipe supports (see accessories on page 3.7).

* Models for plastic tubing do not include spare cutting wheels

RIDGID® Quick-Acting plastic cutter models are equipped to easily convert to cut copper or other metallic tubing.

1. Remove spare copper cutting wheel from knob.
2. Reverse knob position so that the "Cu" notation is visible inside the knob.
3. Screw knob back on to handle.
4. Using the X-CEL Wheel Pin, you can quickly replace the existing plastic cutting wheel with the copper cutting wheel. You're now ready to cut copper, aluminum, and brass tubing.
5. When you wish to revert to plastic cutting, follow the same instructions but make sure to reposition the knob so that "PE" and "PVC" notations are visible inside knob.

PIPE/TUBE CUTTING & PREPARATION

Plastic Drain Pipe Cutter

The RIDGID® P-TEC Cutter is the first cutter of its kind that provides the hassle-free ability to execute a clean, fast, and straight cut on thin-wall (< 2,5 mm) plastic tube. This versatile cutter can be used on Polyethylene (PE), Polypropylene (PP), and Thin-Walled PVC tubes of two standard sizes: 32 and 40 mm OD – both sizes with the same tool. Also available is the P-TEC 5000 for cutting 50 mm plastic drain pipe. The P-TEC Cutter is another addition to the RIDGID Tubing tools family that brings tremendous value to any trade in which PVC / PP / PE pipe is used and installed.

Unique Features and Benefits

- **Clean, Automatic Deburring:** The cut produced by this cutter results in only a fine strand of plastic, as opposed to the fuzz created around the cut of a hacksaw. No need for a second tool to deburr, this cutter automatically deburrs in parallel to cutting action.
- **Automatic Beveling:** Allows for immediate, easy joining to other sink drain pieces.
- **Fast Cut:** On average six rotations to complete one cut, four times faster than a hacksaw.
- **Straight Cut:** Easy-view windows ensure a straight cut on the marked pipe every time.

Clean – Automatic deburring and beveling.

Fast – Cuts in six rotations or less – four times faster than a hacksaw.

Straight – Easy viewing window ensures a cut on the mark.

Open Bore Design – P-TEC 5000 features an open bore design which:

- Reduces required hand force for cutting pipe.
- Fully eliminates sliding on the pipe.
- Makes it possible to cut double-flanged 50 mm plastic drain pipe.

Model 915 Manual Roll Groover

Model 915

The new RIDGID® Model 915 Roll Groover is a manual roll groover for in-place field applications. Model 975 Combo Roll Groover

The Model 975 Combo Roll Groover is two tools in one. Like other RIDGID® roll groovers, the 975 mounts on the RIDGID® 300 Power Drive for machine-powered roll grooving jobs, but it is also designed to manually roll groove in-place pipe.

Auto Tracking & Depth Setting Gauge Means Easier Use

The 975 Combo Groover includes new, patented auto tracking technology for significantly easier grooving. Whether you're doing machine-powered or manual grooving, the AutoTrack gauge keeps the pipe automatically engaged to the groover throughout the grooving process. The 975 also includes a permanently-fixed depth setting gauge for quicker, repeatable set-up.

Less Hand-Force Required

When manually roll grooving, the 975's 55% higher gear reduction means less hand-force is required versus competitive manual roll groovers. This is especially helpful for over-head roll grooving.

Durability And Portability

A tough, ductile iron construction means the 975 can absorb jobsite abuse and provide accurate grooves time after time. A cast-in handle makes the 975 easily portable to and from the jobsite.

Hole Cutting Tools

Model HC300

The RIDGID Model HC300 Hole Cutting Tool is designed to cut holes up to 3" (76 mm) diameter into steel pipe. The multiple hole size allows the use of fittings such as Mechanical T[®], Vic-O-Let[™], Weld-O-Let[™] and others for branching unpressurized pipelines.

The HC300 features a 1/2" (13 mm) capacity chuck to accommodate all sizes of holes up to 3" (76 mm) diameter and standard hole saw arbors up to 7/16" (11 mm). An integral motor and gear reduction optimizes the performance and saw life in the capacity range. A single-feed handle and ON/OFF switch allows for easy operation. The compact two-piece design allows the HC300 to be used in tight quarters and difficult-to-reach locations.

The Model HC300 offers great features that translate into unparalleled field and shop performance.

- **Quick Connecting Two-piece Design.** This unique design allows for easy mounting transport and set up. In addition, weighing only 31 lbs. (14 kg), the unit can be broken down into two lighter weight units for maximum transport and operation comfort. This is particularly useful when working off a ladder or overhead.
- **Single-hand Chain Latching.** The Model HC300 features a patented spring-loaded chain that saves time and significantly aids set up and operation.
- **Ergonomic Design.** With all controls at the operator's fingertips, the tool has been designed for maximum productivity.
- **High Speed.** With a powerful 1.200 W, 11 amp motor, the Model HC300 delivers 360 RPM to quickly bore holes while optimizing hole saw life.
- **Horizontal and vertical flats** to ensure perpendicular cutting.

Model HC450

The RIDGID Model HC450 is engineered for continuous ¼" (6 mm) to 4¾" (120 mm) hole cutting in and up to 8" (203 mm) diameter steel unpressurized pipe. The built-in level ensures line up for multiple holes when branching lines using Mechanical T, Vic-O-Let fittings or welded saddles. Dual-side feed handles provide easier operation from any angle. In addition, the HC450's heavy-duty chuck accommodates ⅝" (3 mm) to ⅝" (16 mm) arbors. The HC450 is ideal for mechanical, industrial maintenance and fire protection contractors since it cuts holes into a wide variety of pipe materials. No off-the-shelf drill-based hole cutter compares in performance or durability to the rugged purposed-built Model 450:

- 13 amp 1.800 W worm-gear driven motor delivers unmatched hole cutting power for both thin and thick wall pipes.
- Engineered for ¼" (6 mm) to 4¾" (120 mm) continuous dry or oiled hole cutting.
- Quickly mounts onto 1¼" (32 mm) to 8" (200 mm) diameter pipe.
- RPM maximizes holesaw life and does not spray lubricant or chips.
- Only 11½" (29 cm) high for low clearance jobs.
- Dual-side controls provide easy operation.
- GFCI and a built-in breaker for operator protection.
- Chuck accommodates ⅝" (3 mm) to ⅝" (16 mm) arbors.

(TOOL TIP) The SF-2300 is designed for frequent use on small diameter pipes up to 1¼" (32 mm steel pipe and 42 mm copper) in commercial applications. For faster pipe freezing of large diameter pipe we recommend using the model SF-2500 (see next page).

TUBE REPAIR & MAINTENANCE

Model SF-2500 SuperFreeze

For fast freezing up to 2½" (65 mm) pipe.

Model SF-2500

Pipe Freezing Tool Avoids the Cost and Inconvenience of a System Shutdown and Purge.

The SuperFreeze Pipe Freezer is an easy-to-use pipe freezing unit that allows the contractor to keep water systems operating while making repairs. The RIDGID Model SF-2500 is a mini-refrigeration unit that circulates self-contained refrigerant to its aluminum freeze heads. This forms an ice plug in as little as 6 minutes in ½" (12 mm) copper tube and can be used with up to 2½" (65 mm) tube or 2" (50 mm) steel pipe. Once the pipe is plugged, repairs can be made while the ice plug is maintained by the unit. Now includes a bottle of specially formulated freeze gel to speed freezing. Apply the gel to freeze heads before placing on pipe.

Handheld Video Inspection

Your world is filled with spaces and components that are just out of reach or eyesight. In many cases it takes more time to locate problems than it does to actually fix them. Whether it's a cracked heat exchanger, a blown hydraulic line, a tricky installation, or a quality assurance parts inspection, RIDGID offers a visual inspection camera to suit your needs.

All RIDGID hand held inspection cameras come equipped with a camera and light source attached to the end of a flexible 3' (90 cm) cable. DRAIN CLEANING

K-3800 Drum Machine

For 3/4" (20 mm) to 4" (110 mm) Drain Lines

The K-3800 is a powerful, easy to transport, versatile Drum machine for cleaning indoor drains. Requires minimal setup to clean sink lines, floor drains and roof vents and features:

- Rugged, corrosion-resistant molded cable drum that won't dent or rust. The drum tilt adjusts for proper cable feed angle. Inner-drum guards against cable flip-over inside the drum.
- Cable drum quick release and built-in hand-holds allow easy cable change and transport.
- Maximum drum capacity is 100' (30,5 m) of 3/8" (10 mm) or 90' (27 m) of 1/2" (12 mm) continuous length cable:
 - 3/8" (10 mm) cable best for 1 1/2" (40 mm) to 3" (75 mm) lines up to 100' (30,5 m).
 - 1/2" (12 mm) cable best for 2" (50 mm) to 4" (110 mm) lines up to 90' (27 m).
- Optional sink drum holds up to 50' (15 m) of 5/16" (8 mm) or 1/4" (6 mm) cable.
 - Ideal for cleaning through 3/4" (20 mm) to 1 1/2" (40 mm) sink traps.
- Powerful 175 W Universal Motor spins cable at 240 RPM. When cable hits blockage, motor gears down automatically to deliver more power and enhance operator control.
- Tools connect to cable in seconds
- Includes a heavy-duty AUTOFEED® system (all modes except machine only).
- Includes RIDGID® leather drain cleaning gloves and operator's manual.

The optional Transport Cart (55017) to mount K-3800 for easy transport to the jobsite

Cable Control & Performance – When Tool Engages Tough Obstructions

Cable contracts towards inner drum.
- Provides additional strength.
- Further protection against cable flip over inside the drum.

Under high torque

Under normal operating conditions

Motor slows while power builds.

- Visual & audible signals indicate torque increase.
- Reduced drum speed provides greater control.

Cable engages compound bend guide tube.
- Retards cable flip over inside the drum.

Inner Core (IC) Cables

Good flexibility and more cleaning power to the cable end.

Rods, Rodding Tools, and Accessories

- RIDGID® K-10 quick-connect couplings make rodding jobs easier than ordinary threaded couplings:
 - To connect rods, align and snap them together for a solid connection (Fig. 1 and 2).
 - To disconnect, insert the pin key and slide the couplings apart (Fig. 3).
- One coupling pin key replaces assembly tool and wrench required to connect ordinary threaded couplings. Easy-to-add rods or tools. No bulky reels.
- Convert existing tools and rods to the RIDGID quick-connect system:
 - One pair of R1 and R2 couplings substitute for one threaded coupling.
 - Standard left-hand and-right hand rod nuts fasten R1 and R2 couplings to existing rods.
 - R-8 couplings adapt each rod tool to quick-connect system.
 - A-2704 adapts rod couplings to larger-size tool couplings.
- RIDGID rods meet ASTM-270 specifications.
- For 1 1/4" (32 mm) cables, tools, and accessories, see page 13.27.
- For 7/8" (22 mm) cables, tools, and accessories, see page 13.27.

The following Heavy-Duty Cable Tools are also recommended for use with rod.
